PROFILE

Full-Stack Software Engineer & Project Executive with end-to-end experience across the software development lifecycle — from requirements gathering and system design through development, user acceptance testing (UAT), deployment, and post-launch maintenance.

Currently spearheading GTA's digitalization initiative at Global Turbine Asia (GTA–SAFRAN JV), designing and building internal systems that replace manual aerospace MRO workflows. Key projects include:

- **Helios** — Helicopter engine maintenance digitalisation system with RFID tool tracking
- **ICP Tracker Dashboard** — Real-time Industrial Collaboration Programme obligation tracker replacing manual Excel-based reporting & tracking.
- **Contract Management Dashboard** — Internal contract lifecycle management system for compliance and commercial governance.
- **GTA Corporate Website** — Company web presence with AI-assisted chatbot

Proficient across the full stack: **React, Next.js, Laravel, PHP, Node.js** (frontend/backend), **MySQL, PostgreSQL, Supabase** (databases), and **Microsoft Azure** (App Service, MySQL Flexible Server, Blob Storage, Bicep IaC) for cloud deployment.

EMPLOYMENT HISTORY

Full-Stack Software Engineer & Project Executive | Global Turbine Asia Sdn. Bhd. — Subang

March 2025 – Present

- Architected and delivered the ICP Tracker & Contract Management Dashboard — a full-stack web application replacing manual Excel workflows, enabling real-time ICV obligation tracking, milestone management, BIP claim submission, and vendor invoice management across 5 active defence contracts.
- Built the Helios MRO Digitalisation System in collaboration with Aerospace Malaysia Innovation Centre (AMIC), digitising helicopter engine maintenance operations with RFID-based tool tracking and digital task cards.
- Developed and deployed the GTA Corporate Website featuring an AI-powered chatbot using Next.js, Vercel AI SDK, and Supabase — serving as the company's primary digital presence.
- Ensured ICP compliance across multiple project categories in accordance with Pekeliling Perbendaharaan Malaysia (PK 1.7), coordinating documentation, ICV generation, and submission workflows.
- Reduced departmental manual workflows by 35% through targeted process automation and system improvements, directly improving data accuracy and cross-department operational efficiency.
- Led UAT sessions and produced end-user training materials, driving successful adoption of digital systems across technical and administrative departments.

Data Analyst (Internship) | Pejabat Pelajaran Daerah Hilir Perak (PPD)

March 2024 – August 2024

- Developed an SPM District Dashboard using Google Apps Script, Sheets, and Drive — enabling data-driven program planning and reducing manual reporting effort.
- Built a Power BI dashboard for the Bahasa Melayu Department, improving reporting clarity and supporting data-based decision-making.

PROJECTS

GTA ICP Tracker & Contract Management Dashboard | Full-Stack Developer — 2025 – Present

- Designed and developed a web-based internal dashboard for Global Turbine Asia's ICP & Offset department, replacing manual Excel-based tracking with a real-time system. Features include multi-contract ICV obligation tracking, milestone management, BIP claim submission workflow, vendor & invoice tracking, and an AI-powered chatbot. Built with React, Vite, Supabase (PostgreSQL), and deployed on Vercel.

GTA HELIOS — Helicopter MRO Operations Digitalisation System | Front-End Developer — 2025

- Collaborated with Aerospace Malaysia Innovation Centre (AMIC) to design and develop internal digital systems covering RFID-based asset tracking, digital work order management, and schedule optimisation for helicopter maintenance operations.

GTA Holdings Corporate Website | Full-Stack Developer — 2025

- Developed a corporate landing page using Next.js, Vercel AI SDK, Jina AI, Tailwind CSS, and Supabase, featuring an AI-assisted chatbot for visitor engagement and lead capture.

Digital Lucky Draw System | Full-Stack Developer — 2026

- Built a reusable event lucky draw platform using React, Tailwind CSS, Axios, Vite, PostgreSQL, JWT, Nodemailer, and Sequelize — fully deployable for any event format.

SPM District Academic Dashboard | Data Analyst Intern — 2024

- Developed a district-level academic performance dashboard using Google Apps Script, Sheets, and Drive — reducing manual reporting and enabling data-driven programme planning.

UPNM E-Commerce Platform | Full-Stack Developer — 2024

- Final Year Project: Designed and developed a student marketplace using HTML, CSS, Bootstrap, PHP, and MySQL, enabling campus buy-and-sell transactions with a secure authentication system.

TECHNICAL SKILLS

Project	ICP Compliance, PK 1.7, Project Documentation, Stakeholder Coordination, UAT, Agile
Frontend	HTML, CSS, JavaScript, React, Next.js, jQuery, Axios, Tailwind CSS, Figma
Backend	Laravel, PHP, Node.js, RESTful APIs, Python, Java, Firebase, AWS Lambda
Database	MySQL, PostgreSQL, Supabase
Cloud & DevOps	Microsoft Azure (App Service, MySQL Flexible Server, Blob Storage, Bicep IaC), Docker (basic), Git, Postman
Data & Tools	Excel, Power BI, Google Apps Script
Emerging Tech	Mixed Reality (MR), AI Integration, Flutter

EDUCATION

Bachelor of Computer Science (Intelligent Systems)

Universiti Pertahanan Nasional Malaysia (UPNM) | Graduated 2024 | CGPA: 3.11

HOBBIES & INTERESTS

Badminton • Gym & Workout • Software Development & Technology Exploration • Travelling.
